

# FONT

## Replacements

\*ERROR  
MISSING  
FONT

For Adobe CC TypeKit users

Font licensing prohibits METRO (or anyone) from packaging fonts within a layout for our users. We have a wide variety of subscribers who have varying tech and application capabilities, budgets and design staffs. We have kept our font set standard for a long time in hopes of catering to the majority of our subscribers, but as fonts advance and tech updates regularly it's hard to keep up while not outpacing newspaper budgets for upgrades.

If you use Adobe Typkit and have found the need to replace many of the missing fonts in Metro ads, our designers have come up with a list of substitutes for our commonly used fonts.

### SANS SERIF

Avenir LT Std	URW Form
Clearface Gothic Std	Fira Sans
